STELMAX™ 1500M

Cold-Rolled Ultra-High
Strength Steel

Stelco produces strong, high performance advanced high strength steel for the demanding needs of North American manufacturers.

Our STELMAX™ product portfolio contains innovative steels engineered to meet the rising expectations of our customers.

STELMAX™ 1500M

Cold Rolled Ultra-High Strength Steel

STELMAX™ 1500M Applications

STELMAX™ 1500M is an ultra-high strength cold rolled fully martensitic steel with a minimum tensile strength of 1500MPa.

Stelco's steel is toll-processed on a continuous annealing line that uses state-of-the-art hydrogen quench technology which produces a strip with excellent shape versus conventional cold water quench technology.

This steel's high strength-to-weight ratio makes it ideal for automotive and non-automotive lightweight applications such as roll-formed and tubular components.

Size Availability

Thickness 0.024" - 0.071"
0.6 mm - 1.8 mm

Max Width 30" - 48"
760 mm - 1220 mm

Mechanical Properties*

Grade	Yield Strength Min - Max (MPa)	Tensile Strength Min - Max (MPa)	Elongation Min (%)
1500	1050 - 1400	1500 - 1700	3%

Mechanical properties tested as per ASTM in the longitudinal direction

* Grades according to OEM standards are available on request.

Chemistry

Grade	C	Mn	Al	Ti	Cr+Mo	B
1500	0.28	1.4	0.07	0.05	0.7	0.004
