Welcome

Review and Approval of Agenda

The committee accepted them as presented. The committee also accepted the draft meeting notes of the previous meeting.

Coke Battery Performance

Katie provided a summary of the performance of the Hamilton Works coke battery operations for Q3 2023 based on the Method 303 environmental audits conducted on a regular basis. Coke battery audit results demonstrated compliance with all 2023 limits.

Jeremy of the Ministry of Environment, Conservation and Parks (MECP) indicated that he conducted two audits at the coke battery in the last quarter. In one audit, there was an operation adjustment; the Stelco Supervisor noticed and took immediate action. It seemed to be a one-off instance, and the Ministry was satisfied with Stelco's response. Separately, Jeremy also shared with the CLC that Charlene will be the Environmental Officer for Stelco Hamilton Works, moving forward.
